## D.1 Introduction

This annex provides the official change history for the AIRA Standard and its associated documents. It records substantive updates, clarifications, additions, and structural revisions across versions. This annex is informative and is intended to support transparency, traceability, and long-term maintenance of the standard.

## D.2 Versioning Model

AIRA follows semantic versioning:

- **Major versions (X.0)** introduce structural changes or new conceptual frameworks.
- **Minor versions (X.Y)** add annexes, clarifications, or non-breaking improvements.
- **Patch versions (X.Y.Z)** correct errors without altering meaning or requirements.

This annex documents changes according to this model.

## D.3 Change Log

The following table summarizes all changes made to the AIRA Standard and its supporting documents.

| Version Date |               | Description of Changes   |
|--------------|---------------|--|
| <b>v1.0</b>  | December 2025 | Initial publication of the AIRA Standard, Overview, Annex A (Disclosure Templates), Annex B (Examples), Annex C (Rationale), and supporting documentation. |

## D.4 Notes on Future Updates

Future versions may include:

- Additional annexes
- Expanded examples
- Clarifications based on community feedback
- Adjustments to definitions as AI tooling evolves
- Editorial improvements

All changes will be recorded in this annex to maintain a clear historical record.

## D.5 Summary

Annex D provides a transparent record of changes to the AIRA Standard and its supporting documents. Version 1.0 represents the initial publication of the standard and establishes the baseline for future updates.
