## B.1 Introduction

This annex provides illustrative examples demonstrating how to apply the AIRA Standard in practical scenarios. These examples are informative and do not introduce new requirements. They are intended to help creators, engineers, editors, and organizations distinguish between non-material AI assistance (within scope) and material AI contributions (outside scope).

## B.2 Text Content Examples

### B.2.1 Non-Material Assistance (In Scope)

#### Example 1 - Grammar and Clarity

Scenario:

A human writes an article and uses AI to correct grammar and improve clarity.

Disclosure:

“AI provided non-material assistance for grammar and clarity.”

#### Example 2 - Structural Suggestions

Scenario:

AI suggests reorganizing paragraphs without adding new ideas.

Disclosure:

“This content was reviewed with non-material AI assistance.”

#### Example 3 - Formatting and Cleanup

Scenario:

AI reformats headings and standardizes spacing.

Disclosure:

“Formatting includes non-material AI assistance.”

### B.2.2 Material Assistance (Out of Scope)

#### Example 4 - Idea Generation

Scenario:

AI proposes new arguments or content sections.

Outcome:

AIRA does not apply.

This requires a different disclosure or classification.

### Example 5 - Drafting Substantive Content

Scenario:

AI writes full paragraphs or sections.

Outcome:

Outside AIRA's scope.

## B.3 Code and Technical Workflows

### B.3.1 Non-Material Assistance (In Scope)

#### Example 6 - Code Review Suggestions

Scenario:

AI suggests renaming variables or improving readability.

Disclosure:

"This commit includes non-material AI assistance."

#### Example 7 - Comment Cleanup

Scenario:

AI rewrites comments for clarity without changing logic.

Disclosure:

"Comments reviewed with non-material AI assistance."

### B.3.2 Material Assistance (Out of Scope)

#### Example 8 - AI-Generated Functions

Scenario:

AI writes a new function or algorithm.

Outcome:

Not eligible for AIRA disclosure.

#### Example 9 - AI-Generated Fixes

Scenario:

AI proposes logic changes or bug fixes.

Outcome:

Outside AIRA's scope.

## B.4 Audiovisual Content

### B.4.1 Non-Material Assistance (In Scope)

#### Example 10 - Caption Cleanup

Scenario:

AI corrects punctuation and timing in captions.

Disclosure:

“Captions reviewed with non-material AI assistance.”

#### Example 11 - Transcript Formatting

Scenario:

AI formats a human-written transcript.

Disclosure:

“Transcript includes non-material AI assistance.”

### B.4.2 Material Assistance (Out of Scope)

#### Example 12 - AI-Generated Narration

Scenario:

AI generates new spoken content.

Outcome:

Not eligible for AIRA disclosure.

#### Example 13 - AI-Generated Visuals

Scenario:

AI creates scenes or imagery.

Outcome:

Outside AIRA’s scope.

## B.5 Collaborative and Organizational Workflows

### B.5.1 Non-Material Assistance (In Scope)

#### Example 14 - Team Editing

Scenario:

Multiple authors use AI for grammar and structural review.

Disclosure:

“This work includes non-material AI assistance used by contributors.”

### Example 15 - Editorial Review

Scenario:

AI helps editors refine clarity and consistency.

Disclosure:

“Editorial review included non-material AI assistance.”

### B.5.2 Material Assistance (Out of Scope)

#### Example 16 - AI-Generated Policy Language

Scenario:

AI drafts new policy text.

Outcome:

Not covered by AIRA.

## B.6 Summary

Annex B provides practical examples illustrating how to apply the AIRA Standard across text, code, audiovisual, and collaborative workflows. These examples clarify the distinction between non-material AI assistance (within scope) and material AI contributions (outside scope), supporting consistent and transparent disclosure practices.
